Edge trim profile made of aluminium

MATERIAL

Aluminium can be used wherever medium mechanical stress is to be expected. Contact with alkaline materials (e.g. tile adhesive) can lead to discolouration, which is difficult to remove afterwards. High humidity can intensify this process. Dirt deposits can be removed with standard cleaning agents. Cleaning agents must be free of scouring powder or aggressive additives.

The suitability with regard to mechanical and chemical resistance must always be checked in each individual case.

CARE

Aluminium does not require any special care. If necessary, it can be cleaned with clear, clean water and a drop of washing-up liquid. Then wipe dry.

Avoid using acidic, alkaline and abrasive cleaning agents.

PROCESSING

1. Cut the profiles to size.
2. The substrate must be cleaned and any contaminants such as release agents, preservatives, grease, oil, dust, water, old adhesives/sealants and other substances that impair adhesion must be removed.
3. Spread MS polymer adhesive evenly over the back of the profile, align the profile and stick it in the desired position.

The generally accepted rules of technology and tiling must be observed. Suitability for use with mechanical and chemical resistance must always be checked in each individual case.

Please note: For technical reasons, tolerances in color effects of the materials and print are possible.

TECHNICAL DIMENSIONS AND PRODUCT VARIANTS

Material	[Aluminium]
Surface	[powder coated], [anodised]
Colour	silver, titanium, black matt (RAL 9005)
Length	270 cm
sight width	14 mm, 16 mm, 18 mm
Height	8 mm, 10 mm, 12 mm, 14 mm
height up to	10 mm, 12 mm, 14 mm, 16 mm
